

AERONOVA AIRWAYS

Cabin Upgrade Eligibility Policy

Document ID: POL-UPG-2026 | Version: 1.0 | Effective: 2026-01-01 to 2026-12-31 | Status: active | Authority: primary

This policy is fictional and was created only for retrieval, routing, and evaluation experiments.

1. Scope

This policy applies to voluntary cabin upgrades on AeroNova-operated flights. Codeshare flights operated by another airline follow the operating carrier's rules. Upgrade availability is never guaranteed and a passenger remains in the ticketed cabin until a new confirmation is issued.

2. Cabin and fare definitions

Economy includes Economy Saver and Economy Flex. Premium Economy Standard is a separate cabin and is not an Economy fare family. Business is AeroNova's highest cabin in this fictional corpus.

3. Core eligibility rule

A passenger whose original ticket was issued in Economy Saver or Economy Flex may not upgrade directly to Business. This restriction applies to cash upgrades, points upgrades, bid upgrades, call-centre offers, online offers, and airport offers.

A passenger whose original ticket was issued in Premium Economy Standard may upgrade to Business when upgrade inventory is available and all other conditions in this policy are met.

4. No sequential-upgrade bypass

The original ticketed cabin controls Business eligibility for the entire journey. A passenger originally ticketed in Economy cannot first upgrade to Premium Economy Standard and then upgrade again to Business on the same journey. Reissuing or modifying the booking does not remove this restriction unless the passenger purchases a new Business ticket under the applicable fare rules.

5. Other conditions

Eligible Premium Economy Standard passengers may request a Business upgrade only on AeroNova-operated flight segments. The upgrade must be confirmed before departure. Group fares, staff travel, infant tickets without a separate seat, and bookings with an unresolved payment or ticketing issue are not eligible for a voluntary Business upgrade.

Upgrade inventory is separate from ordinary seat availability. Seeing an empty Business seat does not prove that an upgrade is available. Taxes, fees, points, and payment requirements are quoted at the time of the offer.

6. Benefits after confirmation

After a confirmed Premium Economy Standard to Business upgrade, the passenger receives the Business seat and onboard service for the upgraded segment. Business baggage allowance applies only when the new ticket or upgrade confirmation explicitly displays it. Lounge access, chauffeur services, and additional loyalty points are included only when stated in the upgrade offer.

7. Changes, refunds, and disruptions

An upgrade fee or points charge follows the conditions shown in the accepted offer. If AeroNova cannot provide the confirmed upgraded cabin, the passenger is returned to the original cabin and the upgrade payment or points are refunded. The underlying ticket remains subject to its original change and refund rules.

8. Operational upgrades

An operational upgrade made by AeroNova for flight-management reasons is not a voluntary customer upgrade and is outside the eligibility path above. It does not change the original fare conditions, baggage allowance, loyalty earning, or eligibility on later segments unless AeroNova confirms otherwise in writing.

9. Decision summary

Original ticketed cabin	Requested cabin	Decision
Economy Saver	Business	Not permitted
Economy Flex	Business	Not permitted
Premium Economy Standard	Business	Permitted if eligible and available
